ELSEVIER

Agricultural Water Management 63 (2003) 211–230

Agricultural water management

www.elsevier.com/locate/agwat

Cumulative Subject Index, Volumes 57–63

Actual evaporation
Satellite measurements supplemented with meteorological data to operationally estimate evaporation in Sri Lanka, 58 (2003) 89

Advance
Estimation of advance and infiltration equations in furrow irrigation for untested discharges, 60 (2003) 227

Agricultural productivity
Enhancing water policy discussions by including analysis of non-water inputs and farm-level constraints, 62 (2003) 93

Agricultural run-off water quality
Phosphorus uptake and release in surface drains, 63 (2003) 109

Agriculture
Water balance variability across Sri Lanka for assessing agricultural and environmental water use, 58 (2003) 171

Agro-ecological zones
Vegetation growth zonation of Sri Lanka for improved water resources planning, 58 (2003) 123

Alfalfa
Effect of irrigation methods and quota on root water uptake and biomass of alfalfa in the Wulanbuhe sandy region of China, 62 (2003) 139

Alkalinization
Actual and potential salt-related soil degradation in an irrigated rice scheme in the Sahelian zone of Mauritania, 60 (2003) 13

Alternative crops
Yield and water use of broadleaf crops in a semiarid climate, 58 (2003) 255

Apricot tree
Spatial representativity of the possible sites for measuring the water balance of apricot trees, 57 (2002) 145

Arid area
Effect of saline drainage effluent on soil health and crop yield, 62 (2003) 127

Artificial neural network
Neural networks for predicting nitrate-nitrogen in drainage water, 63 (2003) 169

Atmometer
Use of the modified atmometer to estimate reference evapotranspiration in Mediterranean environments, 63 (2003) 1

Australia
Farmer participation in markets for temporary and permanent water in southeastern Australia, 63 (2003) 57

Available soil water stored at planting (ASW_p)
Consumption of available soil water stored at planting by winter wheat, 63 (2003) 99

AVHRR
Satellite measurements supplemented with meteorological data to operationally estimate evaporation in Sri Lanka, 58 (2003) 89

Bananas
Using inverse methods for estimating soil hydraulic properties from field data as an alternative to direct methods, 59 (2003) 77

Bell pepper
Mulching decreases nitrate leaching in bell pepper (*Capsicum annuum* L.) cultivation, 60 (2003) 87

doi:10.1016/S0378-3774(03)00262-2

Benefit
Productivity in maize based cropping systems under various soil–water–nutrient management strategies in a semi-arid, alfisol environment in East Africa, 59 (2003) 217

Benefit–cost analysis
Effect of drip irrigation on yield of cabbage (*Brassica oleracea* L. var. *capitata*) under mulch and non-mulch conditions, 58 (2003) 19

Biomass
Effect of irrigation methods and quota on root water uptake and biomass of alfalfa in the Wulanbuhe sandy region of China, 62 (2003) 139

Biomass growth
Vegetation growth zonation of Sri Lanka for improved water resources planning, 58 (2003) 123

Biomass production
Growth and yields of Sri Lanka's major crops interpreted from public domain satellites, 58 (2003) 145

Boll number
Effects of different drip irrigation programs on the boll number and shedding percentage and yield of cotton, 60 (2003) 1

Bowen ratio-energy balance
Water requirements of irrigated mango orchards in northeast Brazil, 58 (2003) 241

Bulk surface resistance
Evapotranspiration estimation performance of root zone water quality model: evaluation and improvement, 57 (2002) 61

Cabbage
Effect of drip irrigation on yield of cabbage (*Brassica oleracea* L. var. *capitata*) under mulch and non-mulch conditions, 58 (2003) 19

Canary Islands
Using inverse methods for estimating soil hydraulic properties from field data as an alternative to direct methods, 59 (2003) 77

Canopy resistance
Fixed versus variable bulk canopy resistance for reference evapotranspiration estimation using the Penman–Monteith equation under semiarid conditions, 60 (2003) 181

Capillary rise
Modelling capillary rise and soil salinity for shallow saline water table under irrigated and non-irrigated conditions, 61 (2003) 125
Model to assess water movement from a shallow water table to the root zone, 62 (2003) 79

CERES-wheat model
Effective management of irrigation water for wheat under stressed conditions, 63 (2003) 37

Charente
Using NIWASAVE to simulate impacts of irrigation heterogeneity on yield and nitrate leaching when using a travelling rain gun system in a shallow soil context in Charente (France), 63 (2003) 15

Climate change scenarios
A simulation study of the effect of soil water balance and water stress on winter wheat production under different climate change scenarios, 61 (2003) 195

Clogging
Drip irrigation emitter clogging in Dutch greenhouses as affected by methane and organic acids, 60 (2003) 73

Coconut
Growth and yields of Sri Lanka's major crops interpreted from public domain satellites, 58 (2003) 145

Coffea canephora
Over-irrigation of *Coffea canephora* in the Central Highlands of Vietnam revisited. Simulation of soil moisture dynamics in Rhodic Ferralsols, 63 (2003) 185

Consumption ratio of ASW_p (Rc)
Consumption of available soil water stored at planting by winter wheat, 63 (2003) 99

Contamination
Impact of treated wastewater irrigation on quality attributes and contamination of tomato fruit, 61 (2003) 51

Contour basin irrigation layouts
Design and management guidelines for contour basin irrigation layouts in southeast Australia, 62 (2003) 19

Controlled deficit irrigation
Production of garlic (*Allium sativum L.*) under controlled deficit irrigation in a semi-arid climate, 59 (2003) 155
Production and quality of the sugar beet (*Beta vulgaris* L.) cultivated under controlled deficit irrigation conditions in a semi-arid climate, 62 (2003) 215

Cotton
Effects of different drip irrigation programs on the boll number and shedding percentage and yield of cotton, 60 (2003) 1
Modeling root growth and the soil–plant–atmosphere continuum of cotton crops, 60 (2003) 99
Crop water use and water use efficiency on irrigated cotton farms in Australia, 61 (2003) 179
Effect of saline drainage effluent on soil health and crop yield, 62 (2003) 127

Crop coefficient
Evapotranspiration estimation performance of root zone water quality model: evaluation and improvement, 57 (2002) 61
Water requirements of irrigated mango orchards in northeast Brazil, 58 (2003) 241
Actual evapotranspiration and crop coefficients of wheat (*Triticum aestivum*) under varying moisture levels of humid tropical canal command area, 59 (2003) 33
Crop coefficient and ratio of transpiration to evapotranspiration of winter wheat and maize in a semi-humid region, 59 (2003) 239
Evapotranspiration analysis and irrigation requirements of quinoa (*Chenopodium quinoa*) in the Bolivian highlands, 60 (2003) 119
Measurement of evapotranspiration of irrigated spring wheat and maize in a semi-arid region of north China, 61 (2003) 1

Crop establishment
Comparing water input and water productivity of transplanted and direct-seeded rice production systems, 57 (2002) 11

Crop ET
Measurement of evapotranspiration of irrigated spring wheat and maize in a semi-arid region of north China, 61 (2003) 1

Crop evapotranspiration
Evapotranspiration analysis and irrigation requirements of quinoa (*Chenopodium quinoa*) in the Bolivian highlands, 60 (2003) 119

Crop growth
Growth and yields of Sri Lanka's major crops interpreted from public domain satellites, 58 (2003) 145

Crop modeling
Model for simulation of winter wheat yield under dryland and irrigated conditions, 58 (2003) 1

Crop root growth
Field test of a soil water balance simulation model, 58 (2003) 223

Crop rotations
Yield and water use of broadleaf crops in a semiarid climate, 58 (2003) 255

Crop salt tolerance
Salinity effect on crop development and yield, analysis of salt tolerance according to several classification methods, 62 (2003) 37

Crop yield
Growth and yields of Sri Lanka's major crops interpreted from public domain satellites, 58 (2003) 145

Cropping systems
Model-based assessment of water balance components under different cropping systems in north-west India, 57 (2002) 75

Cyclic water use
Agricultural water management in water-starved countries: challenges and opportunities, 62 (2003) 165

d_{50}
Spatial representativity of the possible sites for measuring the water balance of apricot trees, 57 (2002) 145

Date palm
Estimating transpiration in an intercropping system: measuring sap flow inside the oasis, 59 (2003) 191

Decision rules
Maize grain yield variability between irrigation stands: a theoretical study, 60 (2003) 43

Decomposition method
Planning and management of a complex water resource system: case of Samanalawewa and

Udawalawe reservoirs in the Walawe river, Sri Lanka, 57 (2002) 207

Deep tubewell
Evaluation of some deep and shallow tubewell irrigated schemes in Bangladesh using performance indicators, 58 (2003) 193

Deficit irrigation
Irrigation management under water scarcity, 57 (2002) 175
Effect of irrigation scheduling on potato crop parameters under water stressed conditions, 59 (2003) 49
Deficit irrigation effects on sweet corn (*Zea mays saccharata* Sturt) with drip irrigation system in a semi-arid region. I. Water-yield relationship, 61 (2003) 63
Effects of deficit irrigation on yield and water use of greenhouse grown cucumber in the North China Plain, 61 (2003) 219
A non-linear model for farm optimization with adequate and limited water supplies. Application to the South-east Anatolian Project (GAP) Region, 62 (2003) 187
Evapotranspiration, yield and water use efficiency of drip irrigated corn in the Bekaa Valley of Lebanon, 63 (2003) 125

Degradation
Adverse effect of waterlogging and soil salinity on crop and land productivity in northwest region of Haryana, India, 57 (2002) 223

Demand management
Irrigation management under water scarcity, 57 (2002) 175

Depletion level
Effective management of irrigation water for wheat under stressed conditions, 63 (2003) 37

Design and management guidelines
Design and management guidelines for contour basin irrigation layouts in southeast Australia, 62 (2003) 19

Digital elevation models
Automatic extraction of tank outlets in a sub-watershed using digital elevation models, 57 (2002) 1

Drain discharge
Evaluation of subsurface drainage performance in Lithuania, 59 (2003) 15

Drainage
A model study of mole drain spacing and performance, 60 (2003) 33

Drainage materials
Evaluation of subsurface drainage performance in Lithuania, 59 (2003) 15

Drainage performance
Evaluation of subsurface drainage performance in Lithuania, 59 (2003) 15

Drainage water
Phosphorus losses to surface waters following organic manure applications to a drained clay soil, 57 (2002) 155

Drainage water re-use
Agricultural water management in water-starved countries: challenges and opportunities, 62 (2003) 165

Drip irrigation
Spatial representativity of the possible sites for measuring the water balance of apricot trees, 57 (2002) 145
Effect of drip irrigation on yield of cabbage (*Brassica oleracea* L. var. *capitata*) under mulch and non-mulch conditions, 58 (2003) 19
Multi-wire time domain reflectometry (TDR) probe with electrical impedance discontinuities for measuring water content distribution, 59 (2003) 205
Effects of different drip irrigation programs on the boll number and shedding percentage and yield of cotton, 60 (2003) 1
Drip irrigation emitter clogging in Dutch greenhouses as affected by methane and organic acids, 60 (2003) 73
The response of sugar beet to drip and low-pressure sprinkler irrigation in southern Italy, 60 (2003) 135
Deficit irrigation effects on sweet corn (*Zea mays saccharata* Sturt) with drip irrigation system in a semi-arid region. I. Water-yield relationship, 61 (2003) 63

Drip irrigation scheduling
Effects of different irrigation regimes on the growth and yield of drip-irrigated potato, 63 (2003) 153

Drip-fertigation
Mulching decreases nitrate leaching in bell pepper (*Capsicum annuum* L.) cultivation, 60 (2003) 87

Dryland farming
Effect of increased fertilizer applications to wheat crop on soil-water depletion in the Loess Plateau, China, 58 (2003) 267

DSSAT crop model
A simulation study of the effect of soil water balance and water stress on winter wheat production under different climate change scenarios, 61 (2003) 195

Dynamic modelling
Maize grain yield variability between irrigation stands: a theoretical study, 60 (2003) 43

Earth dam
Opportunities for increasing productive water use from dam water: a case study from semi-arid Zimbabwe, 62 (2003) 149

Economic analysis
Economic analysis of rainwater harvesting and irrigation methods, with an example from China, 60 (2003) 217

Economics
Enhancing water policy discussions by including analysis of non-water inputs and farm-level constraints, 62 (2003) 93

Empirical method
New empirical formula for hourly estimations of reference evapotranspiration, 60 (2003) 157

Energy balance
Evapotranspiration fluxes over mixed vegetation areas measured from large aperture scintillometer, 58 (2003) 109

Environment
Water balance variability across Sri Lanka for assessing agricultural and environmental water use, 58 (2003) 171

Eutrophication
Phosphorus losses to surface waters following organic manure applications to a drained clay soil, 57 (2002) 155

Evaporation
Opportunities for increasing productive water use from dam water: a case study from semi-arid Zimbabwe, 62 (2003) 149

Evaporative fraction
Evapotranspiration fluxes over mixed vegetation areas measured from large aperture scintillometer, 58 (2003) 109

Evapotranspiration
Response of garlic to irrigation water, 58 (2003) 29
Evapotranspiration fluxes over mixed vegetation areas measured from large aperture scintillometer, 58 (2003) 109
Monitoring irrigation performance in Sri Lanka with high-frequency satellite measurements during the dry season, 58 (2003) 159
Water requirements of irrigated mango orchards in northeast Brazil, 58 (2003) 241
Actual evapotranspiration and crop coefficients of wheat (*Triticum aestivum*) under varying moisture levels of humid tropical canal command area, 59 (2003) 33
Water use efficiencies of grain sorghum grown in three USA southern Great Plains soils, 59 (2003) 97
Crop coefficient and ratio of transpiration to evapotranspiration of winter wheat and maize in a semi-humid region, 59 (2003) 239
Characterizing ground water use by safflower using weighing lysimeters, 60 (2003) 59
Fixed versus variable bulk canopy resistance for reference evapotranspiration estimation using the Penman–Monteith equation under semiarid conditions, 60 (2003) 181
Monitoring irrigation water use by combining Irrigation Advisory Service, and remotely sensed data with a geographic information system, 61 (2003) 111
Crop water use and water use efficiency on irrigated cotton farms in Australia, 61 (2003) 179
Use of the modified atmometer to estimate reference evapotranspiration in Mediterranean environments, 63 (2003) 1
Evapotranspiration, yield and water use efficiency of drip irrigated corn in the Bekaa Valley of Lebanon, 63 (2003) 125

Evapotranspiration modeling
Evapotranspiration estimation performance of root zone water quality model: evaluation and improvement, 57 (2002) 61

Experimental methods
Monitoring water and NO_3-N in irrigated maize fields in the Sorraia Watershed, Portugal, 60 (2003) 199

Externality
Positive externalities and water service management in rice-based irrigation systems of the humid tropics, 59 (2003) 171

Farm management
Analysis of an irrigation district in northeastern Spain. I. Characterisation and water use assessment, 61 (2003) 75

Ferralsol
Over-irrigation of *Coffea canephora* in the Central Highlands of Vietnam revisited. Simulation of soil moisture dynamics in Rhodic Ferralsols, 63 (2003) 185

Fertigation
Field evaluation of crop yield as affected by nonuniformity of sprinkler-applied water and fertilizers, 59 (2003) 1

Fertilizer
Neural networks for predicting nitrate-nitrogen in drainage water, 63 (2003) 169

Field evaluation
Evaluation of subsurface drainage performance in Lithuania, 59 (2003) 15

Field experiment
Field test of a soil water balance simulation model, 58 (2003) 223

Finite element
A model study of mole drain spacing and performance, 60 (2003) 33

Forestry
A model study of mole drain spacing and performance, 60 (2003) 33

Fresh-saline aquifer
Hydraulic and hydro-salinity behavior of skimming wells under different pumping regimes, 61 (2003) 163

Furrow irrigation
Estimation of advance and infiltration equations in furrow irrigation for untested discharges, 60 (2003) 227

Garlic
Response of garlic to irrigation water, 58 (2003) 29
Production of garlic (*Allium sativum L.*) under controlled deficit irrigation in a semi-arid climate, 59 (2003) 155

Gas exchange
The response of sugar beet to drip and low-pressure sprinkler irrigation in southern Italy, 60 (2003) 135

Geochemical modeling
Actual and potential salt-related soil degradation in an irrigated rice scheme in the Sahelian zone of Mauritania, 60 (2003) 13

Geostatistic
Spatial representativity of the possible sites for measuring the water balance of apricot trees, 57 (2002) 145

GIS
GIS-based scheduling and monitoring of irrigation delivery for rice irrigation system. Part I. Scheduling, 62 (2003) 105
GIS-based scheduling and monitoring irrigation delivery for rice irrigation system. Part II. Monitoring, 62 (2003) 117
GIS-based decision support system for groundwater assessment in large irrigation project areas, 62 (2003) 229

GLEAMS-PADDY
Model development for nutrient loading from paddy rice fields, 62 (2003) 1

Grain yield variability
Maize grain yield variability between irrigation stands: a theoretical study, 60 (2003) 43

Grazing
Quantification and simulation of surface runoff from fescue grassland watersheds, 59 (2003) 137

Greenhouse grown cucumber
Effects of deficit irrigation on yield and water use of greenhouse grown cucumber in the North China Plain, 61 (2003) 219

Groundwater
Model to assess water movement from a shallow water table to the root zone, 62 (2003) 79

Groundwater contamination
A physical model to make short-term management decisions at effluent-irrigated land treatment system, 58 (2003) 55

Groundwater model
GIS-based decision support system for groundwater assessment in large irrigation project areas, 62 (2003) 229

Groundwater pollution
Nitrate contamination of a rural aquifer and accumulation in the unsaturated zone, 57 (2002) 33
Dynamics of water flow and fertilizer solute leaching in lateritic soils of Kharagpur region, India, 63 (2003) 77

Groundwater uptake
A simulation study of the effect of soil water balance and water stress on winter wheat production under different climate change scenarios, 61 (2003) 195

Hourly reference evapotranspiration
New empirical formula for hourly estimations of reference evapotranspiration, 60 (2003) 157

Hydro-salinity
Hydraulic and hydro-salinity behavior of skimming wells under different pumping regimes, 61 (2003) 163

Increased productivity
Effect of increased fertilizer applications to wheat crop on soil-water depletion in the Loess Plateau, China, 58 (2003) 267

Indus basin
Hydraulic and hydro-salinity behavior of skimming wells under different pumping regimes, 61 (2003) 163

Infiltration
Estimation of advance and infiltration equations in furrow irrigation for untested discharges, 60 (2003) 227

Institutional reform
Water scarcity, pricing mechanism and institutional reform in northern China irrigated agriculture, 61 (2003) 143

Integrated water management
Enhancing water policy discussions by including analysis of non-water inputs and farm-level constraints, 62 (2003) 93

Intercropping
Estimating transpiration in an intercropping system: measuring sap flow inside the oasis, 59 (2003) 191

Intermittent pumping
Hydraulic and hydro-salinity behavior of skimming wells under different pumping regimes, 61 (2003) 163

Inverse modeling
Using inverse methods for estimating soil hydraulic properties from field data as an alternative to direct methods, 59 (2003) 77

Irrigated rice
Actual and potential salt-related soil degradation in an irrigated rice scheme in the Sahelian zone of Mauritania, 60 (2003) 13

Irrigation
Comparing water input and water productivity of transplanted and direct-seeded rice production systems, 57 (2002) 11
Response of garlic to irrigation water, 58 (2003) 29
Irrigation based on a nomogram using soil suction measurements, 58 (2003) 45
Water requirements of irrigated mango orchards in northeast Brazil, 58 (2003) 241
Effect of irrigation scheduling on potato crop parameters under water stressed conditions, 59 (2003) 49
Impact of treated wastewater irrigation on quality attributes and contamination of tomato fruit, 61 (2003) 51
Crop water use and water use efficiency on irrigated cotton farms in Australia, 61 (2003) 179
Effect of irrigation methods and quota on root water uptake and biomass of alfalfa in the Wulanbuhe sandy region of China, 62 (2003) 139
Management turning-over and participatory management of irrigation schemes: a case study of the Gediz River Basin in Turkey, 62 (2003) 205
GIS-based decision support system for groundwater assessment in large irrigation project areas, 62 (2003) 229
Use of the modified atmometer to estimate reference evapotranspiration in Mediterranean environments, 63 (2003) 1
Effective management of irrigation water for wheat under stressed conditions, 63 (2003) 37
Over-irrigation of *Coffea canephora* in the Central Highlands of Vietnam revisited. Simulation of

soil moisture dynamics in Rhodic Ferralsols, 63 (2003) 185

Irrigation Advisory Service
Monitoring irrigation water use by combining Irrigation Advisory Service, and remotely sensed data with a geographic information system, 61 (2003) 111

Irrigation charge
Water scarcity, pricing mechanism and institutional reform in northern China irrigated agriculture, 61 (2003) 143

Irrigation drains
Phosphorus uptake and release in surface drains, 63 (2003) 109

Irrigation frequency
Deficit irrigation effects on sweet corn (*Zea mays saccharata* Sturt) with drip irrigation system in a semi-arid region. I. Water-yield relationship, 61 (2003) 63

Irrigation indices
GIS-based scheduling and monitoring irrigation delivery for rice irrigation system. Part II. Monitoring, 62 (2003) 117

Irrigation methods
Irrigation management under water scarcity, 57 (2002) 175

Irrigation performance
Irrigation management under water scarcity, 57 (2002) 175
Analysis of an irrigation district in northeastern Spain. I. Characterisation and water use assessment, 61 (2003) 75

Irrigation requirement
Model-based assessment of water balance components under different cropping systems in north-west India, 57 (2002) 75

Irrigation scheduling
Maize grain yield variability between irrigation stands: a theoretical study, 60 (2003) 43
Development of an on-time logger for irrigation systems, 62 (2003) 67
A non-linear model for farm optimization with adequate and limited water supplies. Application to the South-east Anatolian Project (GAP) Region, 62 (2003) 187

Irrigation system
Positive externalities and water service management in rice-based irrigation systems of the humid tropics, 59 (2003) 171

Irrigation uniformity
Analysis of an irrigation district in northeastern Spain. II. Irrigation evaluation, simulation and scheduling, 61 (2003) 93

Irrigation water use efficiency
Water use efficiencies of grain sorghum grown in three USA southern Great Plains soils, 59 (2003) 97

Irrigation–drainage system
Estimating water table contributions to corn and sorghum water use, 58 (2003) 67

Land cover
Vegetation growth zonation of Sri Lanka for improved water resources planning, 58 (2003) 123

Land formation practice
Development of hydrologically optimal land formation practice for gully erosion susceptible ustifluvent soil, 59 (2003) 113

Land treatment system (LTS)
A physical model to make short-term management decisions at effluent-irrigated land treatment system, 58 (2003) 55

Land use
Vegetation growth zonation of Sri Lanka for improved water resources planning, 58 (2003) 123

Leaf area index
Crop coefficient and ratio of transpiration to evapotranspiration of winter wheat and maize in a semi-humid region, 59 (2003) 239

Leaf water potential
Modeling root growth and the soil–plant–atmosphere continuum of cotton crops, 60 (2003) 99

Limited water supply
A non-linear model for farm optimization with adequate and limited water supplies.

Application to the South-east Anatolian Project (GAP) Region, 62 (2003) 187

Line-source
Response of garlic to irrigation water, 58 (2003) 29

Livestock
Phosphorus losses to surface waters following organic manure applications to a drained clay soil, 57 (2002) 155

Low subsoil conductivity
Soil characteristics and constraints to crop production in inland valley bottoms in southwestern Nigeria, 61 (2003) 13

Lycopersicon esculentum
Impact of treated wastewater irrigation on quality attributes and contamination of tomato fruit, 61 (2003) 51

Lysimeter
Water use efficiencies of grain sorghum grown in three USA southern Great Plains soils, 59 (2003) 97
Mulching decreases nitrate leaching in bell pepper (*Capsicum annuum* L.) cultivation, 60 (2003) 87
Measurement of evapotranspiration of irrigated spring wheat and maize in a semi-arid region of north China, 61 (2003) 1

Lysimeters
Characterizing ground water use by safflower using weighing lysimeters, 60 (2003) 59

Madagascar
Irrigation based on a nomogram using soil suction measurements, 58 (2003) 45

Maize
Estimating water table contributions to corn and sorghum water use, 58 (2003) 67
Productivity in maize based cropping systems under various soil–water–nutrient management strategies in a semi-arid, alfisol environment in East Africa, 59 (2003) 217
Maize grain yield variability between irrigation stands: a theoretical study, 60 (2003) 43
Measurement of evapotranspiration of irrigated spring wheat and maize in a semi-arid region of north China, 61 (2003) 1

Maize (*Zea Mays*)
Crop coefficient and ratio of transpiration to evapotranspiration of winter wheat and maize in a semi-humid region, 59 (2003) 239

Management
Management turning-over and participatory management of irrigation schemes: a case study of the Gediz River Basin in Turkey, 62 (2003) 205

Management issues
A physical model to make short-term management decisions at effluent-irrigated land treatment system, 58 (2003) 55

Manure
Neural networks for predicting nitrate-nitrogen in drainage water, 63 (2003) 169

Mauritania
Actual and potential salt-related soil degradation in an irrigated rice scheme in the Sahelian zone of Mauritania, 60 (2003) 13

Meteorological factors
New empirical formula for hourly estimations of reference evapotranspiration, 60 (2003) 157

Methane
Drip irrigation emitter clogging in Dutch greenhouses as affected by methane and organic acids, 60 (2003) 73

Micro-logger
Development of an on-time logger for irrigation systems, 62 (2003) 67

Miscible solute displacement
Dynamics of water flow and fertilizer solute leaching in lateritic soils of Kharagpur region, India, 63 (2003) 77

Model
Modeling root growth and the soil–plant–atmosphere continuum of cotton crops, 60 (2003) 99
Model development for nutrient loading from paddy rice fields, 62 (2003) 1

Modeling
Over-irrigation of *Coffea canephora* in the Central Highlands of Vietnam revisited. Simulation of soil moisture dynamics in Rhodic Ferralsols, 63 (2003) 185

Mole
A model study of mole drain spacing and performance, 60 (2003) 33

Monitoring
GIS-based scheduling and monitoring irrigation delivery for rice irrigation system. Part II. Monitoring, 62 (2003) 117

Monitoring and evaluation
Development of an on-time logger for irrigation systems, 62 (2003) 67

Mulching material
Mulching decreases nitrate leaching in bell pepper (*Capsicum annuum* L.) cultivation, 60 (2003) 87

Multilevel coordinate search
Using inverse methods for estimating soil hydraulic properties from field data as an alternative to direct methods, 59 (2003) 77

NDVI
Monitoring irrigation water use by combining Irrigation Advisory Service, and remotely sensed data with a geographic information system, 61 (2003) 111

Nitrate leaching
Nitrate contamination of a rural aquifer and accumulation in the unsaturated zone, 57 (2002) 33
Mulching decreases nitrate leaching in bell pepper (*Capsicum annuum* L.) cultivation, 60 (2003) 87
Monitoring water and NO_3-N in irrigated maize fields in the Sorraia Watershed, Portugal, 60 (2003) 199
Neural networks for predicting nitrate-nitrogen in drainage water, 63 (2003) 169

NIWASAVE
Using NIWASAVE to simulate impacts of irrigation heterogeneity on yield and nitrate leaching when using a travelling rain gun system in a shallow soil context in Charente (France), 63 (2003) 15

NO_3 and K^+ leaching
Dynamics of water flow and fertilizer solute leaching in lateritic soils of Kharagpur region, India, 63 (2003) 77

Non-irrigated wheat
Model for simulation of winter wheat yield under dryland and irrigated conditions, 58 (2003) 1

Non-linear model
A non-linear model for farm optimization with adequate and limited water supplies. Application to the South-east Anatolian Project (GAP) Region, 62 (2003) 187

Non-point source pollution
Model development for nutrient loading from paddy rice fields, 62 (2003) 1

Nutrient loading
Model development for nutrient loading from paddy rice fields, 62 (2003) 1

Oasis
Estimating transpiration in an intercropping system: measuring sap flow inside the oasis, 59 (2003) 191

Observation period
Evaluation of subsurface drainage performance in Lithuania, 59 (2003) 15

Optimization
A non-linear model for farm optimization with adequate and limited water supplies. Application to the South-east Anatolian Project (GAP) Region, 62 (2003) 187

Optimum reservoir operation
Planning and management of a complex water resource system: case of Samanalawewa and Udawalawe reservoirs in the Walawe river, Sri Lanka, 57 (2002) 207

Organic acids
Drip irrigation emitter clogging in Dutch greenhouses as affected by methane and organic acids, 60 (2003) 73

Osmotic adjustment
Salinity effect on crop development and yield, analysis of salt tolerance according to several classification methods, 62 (2003) 37

Outlets and boundaries
Automatic extraction of tank outlets in a sub-watershed using digital elevation models, 57 (2002) 1

Paddy rice
Model development for nutrient loading from paddy rice fields, 62 (2003) 1

Paddy straw
Effect of drip irrigation on yield of cabbage (*Brassica oleracea* L. var. *capitata*) under mulch and non-mulch conditions, 58 (2003) 19

Pakistan
Effect of saline drainage effluent on soil health and crop yield, 62 (2003) 127

Pan evaporation
Effects of different irrigation regimes on the growth and yield of drip-irrigated potato, 63 (2003) 153

Participatory management
Management turning-over and participatory management of irrigation schemes: a case study of the Gediz River Basin in Turkey, 62 (2003) 205

Penman–Monteith
New empirical formula for hourly estimations of reference evapotranspiration, 60 (2003) 157

Penman–Monteith equation
Fixed versus variable bulk canopy resistance for reference evapotranspiration estimation using the Penman–Monteith equation under semiarid conditions, 60 (2003) 181

Perched water table
Dynamics of water flow and fertilizer solute leaching in lateritic soils of Kharagpur region, India, 63 (2003) 77

Percolation rate
Percolation losses of water in relation to puddling intensity and depth in a sandy loam rice (*Oryza sativa*) field, 57 (2002) 49

Performance evaluation
Evaluation of some deep and shallow tubewell irrigated schemes in Bangladesh using performance indicators, 58 (2003) 193

Performance indicators
Monitoring irrigation performance in Sri Lanka with high-frequency satellite measurements during the dry season, 58 (2003) 159
Evaluation of some deep and shallow tubewell irrigated schemes in Bangladesh using performance indicators, 58 (2003) 193

Phosphorus
Phosphorus losses to surface waters following organic manure applications to a drained clay soil, 57 (2002) 155

Phosphorus transfer
Phosphorus uptake and release in surface drains, 63 (2003) 109

Phytoremediation
Agricultural water management in water-starved countries: challenges and opportunities, 62 (2003) 165

Pivot
Irrigation based on a nomogram using soil suction measurements, 58 (2003) 45

Plant available water
Water use efficiencies of grain sorghum grown in three USA southern Great Plains soils, 59 (2003) 97

Plastic mulch
Effect of drip irrigation on yield of cabbage (*Brassica oleracea* L. var. *capitata*) under mulch and non-mulch conditions, 58 (2003) 19

Plot infiltration
Development of hydrologically optimal land formation practice for gully erosion susceptible ustifluvent soil, 59 (2003) 113

Policy analysis
Enhancing water policy discussions by including analysis of non-water inputs and farm-level constraints, 62 (2003) 93

Poor drainage
Soil characteristics and constraints to crop production in inland valley bottoms in southwestern Nigeria, 61 (2003) 13

Potato
Effect of irrigation scheduling on potato crop parameters under water stressed conditions, 59 (2003) 49

Potato (*Solanum tuberosum* L.)
Effects of different irrigation regimes on the growth and yield of drip-irrigated potato, 63 (2003) 153

Pre-dawn leaf water potential
Salinity effect on crop development and yield, analysis of salt tolerance according to several classification methods, 62 (2003) 37

Pressure switch
Development of an on-time logger for irrigation systems, 62 (2003) 67

Probe design
Multi-wire time domain reflectometry (TDR) probe with electrical impedance discontinuities for measuring water content distribution, 59 (2003) 205

Production functions
Effect of irrigation scheduling on potato crop parameters under water stressed conditions, 59 (2003) 49
Production of garlic (*Allium sativum L.*) under controlled deficit irrigation in a semi-arid climate, 59 (2003) 155
Effects of deficit irrigation on yield and water use of greenhouse grown cucumber in the North China Plain, 61 (2003) 219

Productivity of water
Monitoring irrigation performance in Sri Lanka with high-frequency satellite measurements during the dry season, 58 (2003) 159

Puddling depth
Percolation losses of water in relation to puddling intensity and depth in a sandy loam rice (*Oryza sativa*) field, 57 (2002) 49

Puddling intensity
Percolation losses of water in relation to puddling intensity and depth in a sandy loam rice (*Oryza sativa*) field, 57 (2002) 49

Quality
Impact of treated wastewater irrigation on quality attributes and contamination of tomato fruit, 61 (2003) 51

Radiometry
Monitoring irrigation water use by combining Irrigation Advisory Service, and remotely sensed data with a geographic information system, 61 (2003) 111

Rainwater harvesting
Economic analysis of rainwater harvesting and irrigation methods, with an example from China, 60 (2003) 217

Reduction function
Simulation of root water uptake. I. Non-uniform transient salinity using different macroscopic reduction functions, 57 (2002) 89
Simulation of root water uptake. II. Non-uniform transient water stress using different reduction functions, 57 (2002) 111

Reference ET
Measurement of evapotranspiration of irrigated spring wheat and maize in a semi-arid region of north China, 61 (2003) 1

Reference evapotranspiration
Evapotranspiration analysis and irrigation requirements of quinoa (*Chenopodium quinoa*) in the Bolivian highlands, 60 (2003) 119

Remote sensing
Water balance variability across Sri Lanka for assessing agricultural and environmental water use, 58 (2003) 171
Monitoring irrigation water use by combining Irrigation Advisory Service, and remotely sensed data with a geographic information system, 61 (2003) 111

Reservoir operational policies
Planning and management of a complex water resource system: case of Samanalawewa and Udawalawe reservoirs in the Walawe river, Sri Lanka, 57 (2002) 207

Rice
Percolation losses of water in relation to puddling intensity and depth in a sandy loam rice (*Oryza sativa*) field, 57 (2002) 49
Growth and yields of Sri Lanka's major crops interpreted from public domain satellites, 58 (2003) 145
Rice growth and yield respond to changes in water depth and salinity stress, 59 (2003) 67
Positive externalities and water service management in rice-based irrigation systems of the humid tropics, 59 (2003) 171
GIS-based scheduling and monitoring irrigation delivery for rice irrigation system. Part II. Monitoring, 62 (2003) 117

Rice husk
Effect of drip irrigation on yield of cabbage (*Brassica oleracea* L. var. *capitata*) under mulch and non-mulch conditions, 58 (2003) 19

Rice irrigation
GIS-based scheduling and monitoring of irrigation delivery for rice irrigation system. Part I. Scheduling, 62 (2003) 105

Rice yield
Monitoring irrigation performance in Sri Lanka with high-frequency satellite measurements during the dry season, 58 (2003) 159

Rill and gully erosion
Development of hydrologically optimal land formation practice for gully erosion susceptible ustifluvent soil, 59 (2003) 113

Root water uptake
Simulation of root water uptake. I. Non-uniform transient salinity using different macroscopic reduction functions, 57 (2002) 89
Simulation of root water uptake. III. Non-uniform transient combined salinity and water stress, 57 (2002) 127

Roots
Modeling root growth and the soil–plant–atmosphere continuum of cotton crops, 60 (2003) 99

Rubber
Growth and yields of Sri Lanka's major crops interpreted from public domain satellites, 58 (2003) 145

Runoff
Model development for nutrient loading from paddy rice fields, 62 (2003) 1
Opportunities for increasing productive water use from dam water: a case study from semi-arid Zimbabwe, 62 (2003) 149

Saccharum
Irrigation based on a nomogram using soil suction measurements, 58 (2003) 45

Safflower
Characterizing ground water use by safflower using weighing lysimeters, 60 (2003) 59

Sahel
Actual and potential salt-related soil degradation in an irrigated rice scheme in the Sahelian zone of Mauritania, 60 (2003) 13
Supplemental irrigation for dry-spell mitigation of rainfed agriculture in the Sahel, 61 (2003) 29

Saline drainage effluent
Effect of saline drainage effluent on soil health and crop yield, 62 (2003) 127

Saline waters
Irrigation management under water scarcity, 57 (2002) 175

Saline-upconing
Hydraulic and hydro-salinity behavior of skimming wells under different pumping regimes, 61 (2003) 163

Salinity
Simulation of root water uptake. I. Non-uniform transient salinity using different macroscopic reduction functions, 57 (2002) 89
Adverse effect of waterlogging and soil salinity on crop and land productivity in northwest region of Haryana, India, 57 (2002) 223
Rice growth and yield respond to changes in water depth and salinity stress, 59 (2003) 67
Characterizing ground water use by safflower using weighing lysimeters, 60 (2003) 59
Modelling capillary rise and soil salinity for shallow saline water table under irrigated and non-irrigated conditions, 61 (2003) 125
Effect of saline drainage effluent on soil health and crop yield, 62 (2003) 127

Salinity stress
Simulation of root water uptake. III. Non-uniform transient combined salinity and water stress, 57 (2002) 127

Sap flow
Estimating transpiration in an intercropping system: measuring sap flow inside the oasis, 59 (2003) 191

Satellite data
Monitoring irrigation performance in Sri Lanka with high-frequency satellite measurements during the dry season, 58 (2003) 159

Scheduling
GIS-based scheduling and monitoring of irrigation delivery for rice irrigation system. Part I. Scheduling, 62 (2003) 105

Scintillometer
Evapotranspiration fluxes over mixed vegetation areas measured from large aperture scintillometer, 58 (2003) 109

Second degree polynomial
Evaluation of subsurface drainage performance in Lithuania, 59 (2003) 15

Seedling establishment
Rice growth and yield respond to changes in water depth and salinity stress, 59 (2003) 67

Seepage
GIS-based decision support system for groundwater assessment in large irrigation project areas, 62 (2003) 229

Semi-arid
Productivity in maize based cropping systems under various soil–water–nutrient management strategies in a semi-arid, alfisol environment in East Africa, 59 (2003) 217
Opportunities for increasing productive water use from dam water: a case study from semi-arid Zimbabwe, 62 (2003) 149

Semiarid region
Economic analysis of rainwater harvesting and irrigation methods, with an example from China, 60 (2003) 217

Semivariogram
Spatial representativity of the possible sites for measuring the water balance of apricot trees, 57 (2002) 145

Sensible heat flux
Evapotranspiration fluxes over mixed vegetation areas measured from large aperture scintillometer, 58 (2003) 109

Sequential water use
Agricultural water management in water-starved countries: challenges and opportunities, 62 (2003) 165

Service management
Positive externalities and water service management in rice-based irrigation systems of the humid tropics, 59 (2003) 171

Sewage sludge
Phosphorus losses to surface waters following organic manure applications to a drained clay soil, 57 (2002) 155

Shallow ground water
Characterizing ground water use by safflower using weighing lysimeters, 60 (2003) 59

Shallow tubewell
Evaluation of some deep and shallow tubewell irrigated schemes in Bangladesh using performance indicators, 58 (2003) 193

Shallow water table
Estimating water table contributions to corn and sorghum water use, 58 (2003) 67

Shedding percentage
Effects of different drip irrigation programs on the boll number and shedding percentage and yield of cotton, 60 (2003) 1

Short and longer-term management decisions
A physical model to make short-term management decisions at effluent-irrigated land treatment system, 58 (2003) 55

Simulation
Simulation of root water uptake. I. Non-uniform transient salinity using different macroscopic reduction functions, 57 (2002) 89
Simulation of root water uptake. II. Non-uniform transient water stress using different reduction functions, 57 (2002) 111
Simulation of root water uptake. III. Non-uniform transient combined salinity and water stress, 57 (2002) 127
Planning and management of a complex water resource system: case of Samanalawewa and Udawalawe reservoirs in the Walawe river, Sri Lanka, 57 (2002) 207
Modeling the soil water balance based on time-dependent hydraulic conductivity under different tillage practices, 63 (2003) 139

Simulation model
Field test of a soil water balance simulation model, 58 (2003) 223
Analysis of an irrigation district in northeastern Spain. II. Irrigation evaluation, simulation and scheduling, 61 (2003) 93

Skimming wells
Hydraulic and hydro-salinity behavior of skimming wells under different pumping regimes, 61 (2003) 163

Small reservoir and productive water use
Opportunities for increasing productive water use from dam water: a case study from semi-arid Zimbabwe, 62 (2003) 149

Small size of valleys
Soil characteristics and constraints to crop production in inland valley bottoms in southwestern Nigeria, 61 (2003) 13

Small-holder
Productivity in maize based cropping systems under various soil–water–nutrient management strategies in a semi-arid, alfisol environment in East Africa, 59 (2003) 217

Snow
Quantification and simulation of surface runoff from fescue grassland watersheds, 59 (2003) 137

Sodicity
Adverse effect of waterlogging and soil salinity on crop and land productivity in northwest region of Haryana, India, 57 (2002) 223
Effect of saline drainage effluent on soil health and crop yield, 62 (2003) 127

Soil
Using NIWASAVE to simulate impacts of irrigation heterogeneity on yield and nitrate leaching when using a travelling rain gun system in a shallow soil context in Charente (France), 63 (2003) 15

Soil loss
Development of hydrologically optimal land formation practice for gully erosion susceptible ustifluvent soil, 59 (2003) 113

Soil nutrients
Supplemental irrigation for dry-spell mitigation of rainfed agriculture in the Sahel, 61 (2003) 29

Soil salinity
Salinity effect on crop development and yield, analysis of salt tolerance according to several classification methods, 62 (2003) 37

Soil texture
Model-based assessment of water balance components under different cropping systems in north-west India, 57 (2002) 75

Soil water
Field test of a soil water balance simulation model, 58 (2003) 223

Soil water assessment tool (SWAT) model
Quantification and simulation of surface runoff from fescue grassland watersheds, 59 (2003) 137

Soil water balance
Field test of a soil water balance simulation model, 58 (2003) 223
Water requirements of irrigated mango orchards in northeast Brazil, 58 (2003) 241
A simulation study of the effect of soil water balance and water stress on winter wheat production under different climate change scenarios, 61 (2003) 195
Model to assess water movement from a shallow water table to the root zone, 62 (2003) 79
GIS-based decision support system for groundwater assessment in large irrigation project areas, 62 (2003) 229
Modeling the soil water balance based on time-dependent hydraulic conductivity under different tillage practices, 63 (2003) 139

Soil water depletion
Water use efficiencies of grain sorghum grown in three USA southern Great Plains soils, 59 (2003) 97

Soil water measurements
Characterizing ground water use by safflower using weighing lysimeters, 60 (2003) 59

Soil water stress coefficients
Actual evapotranspiration and crop coefficients of wheat (*Triticum aestivum*) under varying moisture levels of humid tropical canal command area, 59 (2003) 33

Soil-water
Effect of increased fertilizer applications to wheat crop on soil-water depletion in the Loess Plateau, China, 58 (2003) 267

Solar radiation
Estimating transpiration in an intercropping system: measuring sap flow inside the oasis, 59 (2003) 191

Sorghum
Estimating water table contributions to corn and sorghum water use, 58 (2003) 67
Supplemental irrigation for dry-spell mitigation of rainfed agriculture in the Sahel, 61 (2003) 29

Spacing
A model study of mole drain spacing and performance, 60 (2003) 33

Spatial and temporal distribution
Automatic extraction of tank outlets in a sub-watershed using digital elevation models, 57 (2002) 1

Specific leaf weight (SLW)
Effects of different irrigation regimes on the growth and yield of drip-irrigated potato, 63 (2003) 153

Spring wheat
Measurement of evapotranspiration of irrigated spring wheat and maize in a semi-arid region of north China, 61 (2003) 1

Sprinkler irrigation
Field evaluation of crop yield as affected by nonuniformity of sprinkler-applied water and fertilizers, 59 (2003) 1
Analysis of an irrigation district in northeastern Spain. I. Characterisation and water use assessment, 61 (2003) 75
Analysis of an irrigation district in northeastern Spain. II. Irrigation evaluation, simulation and scheduling, 61 (2003) 93

Sri Lanka
Satellite measurements supplemented with meteorological data to operationally estimate evaporation in Sri Lanka, 58 (2003) 89
Water balance variability across Sri Lanka for assessing agricultural and environmental water use, 58 (2003) 171

Statistical evaluation
Quantification and simulation of surface runoff from fescue grassland watersheds, 59 (2003) 137

Stochastic dynamic programming
Planning and management of a complex water resource system: case of Samanalawewa and Udawalawe reservoirs in the Walawe river, Sri Lanka, 57 (2002) 207

Stomatal resistance
Evapotranspiration estimation performance of root zone water quality model: evaluation and improvement, 57 (2002) 61

Straw mulching
Model-based assessment of water balance components under different cropping systems in north-west India, 57 (2002) 75

Subsurface drainage
Neural networks for predicting nitrate-nitrogen in drainage water, 63 (2003) 169

Sub-watersheds
Automatic extraction of tank outlets in a sub-watershed using digital elevation models, 57 (2002) 1

Sugar beet
The response of sugar beet to drip and low-pressure sprinkler irrigation in southern Italy, 60 (2003) 135
Production and quality of the sugar beet (*Beta vulgaris* L.) cultivated under controlled deficit irrigation conditions in a semi-arid climate, 62 (2003) 215

Supplemental irrigation
Economic analysis of rainwater harvesting and irrigation methods, with an example from China, 60 (2003) 217
Supplemental irrigation for dry-spell mitigation of rainfed agriculture in the Sahel, 61 (2003) 29

Supply management
Irrigation management under water scarcity, 57 (2002) 175

Surface drainage
Phosphorus uptake and release in surface drains, 63 (2003) 109

Sustainability
Adverse effect of waterlogging and soil salinity on crop and land productivity in northwest region of Haryana, India, 57 (2002) 223

Sweet corn
Deficit irrigation effects on sweet corn (*Zea mays saccharata* Sturt) with drip irrigation system in a semi-arid region. I. Water-yield relationship, 61 (2003) 63

Synergism
Yield and water use of broadleaf crops in a semiarid climate, 58 (2003) 255

Tanks
Automatic extraction of tank outlets in a sub-watershed using digital elevation models, 57 (2002) 1

Tea
Growth and yields of Sri Lanka's major crops interpreted from public domain satellites, 58 (2003) 145

Ten-day averaging
Satellite measurements supplemented with meteorological data to operationally estimate evaporation in Sri Lanka, 58 (2003) 89

Tensiometers
Irrigation based on a nomogram using soil suction measurements, 58 (2003) 45

The Loess Plateau
Effect of increased fertilizer applications to wheat crop on soil-water depletion in the Loess Plateau, China, 58 (2003) 267

Tied-ridging
Productivity in maize based cropping systems under various soil–water–nutrient management strategies in a semi-arid, alfisol environment in East Africa, 59 (2003) 217

Tillage practices
Modeling the soil water balance based on time-dependent hydraulic conductivity under different tillage practices, 63 (2003) 139

Time domain reflectometry (TDR)
Comparison of calculated and measured volumetric water content at four field sites, 58 (2003) 209
Multi-wire time domain reflectometry (TDR) probe with electrical impedance discontinuities for measuring water content distribution, 59 (2003) 205

Time-dependent hydraulic parameters
Modeling the soil water balance based on time-dependent hydraulic conductivity under different tillage practices, 63 (2003) 139

Tomato
Impact of treated wastewater irrigation on quality attributes and contamination of tomato fruit, 61 (2003) 51

Total head loss
Evaluation of subsurface drainage performance in Lithuania, 59 (2003) 15

Trafficability
A model study of mole drain spacing and performance, 60 (2003) 33

Transient
Simulation of root water uptake. I. Non-uniform transient salinity using different macroscopic reduction functions, 57 (2002) 89
Simulation of root water uptake. II. Non-uniform transient water stress using different reduction functions, 57 (2002) 111

Transpiration
Estimating transpiration in an intercropping system: measuring sap flow inside the oasis, 59 (2003) 191
Crop coefficient and ratio of transpiration to evapotranspiration of winter wheat and maize in a semi-humid region, 59 (2003) 239

Trend surface analysis
New empirical formula for hourly estimations of reference evapotranspiration, 60 (2003) 157

Trichoderma
Drip irrigation emitter clogging in Dutch greenhouses as affected by methane and organic acids, 60 (2003) 73

Turning-over
Management turning-over and participatory management of irrigation schemes: a case study of the Gediz River Basin in Turkey, 62 (2003) 205

Under-bund percolation
Percolation losses of water in relation to puddling intensity and depth in a sandy loam rice (*Oryza sativa*) field, 57 (2002) 49

Uniformity
Field evaluation of crop yield as affected by nonuniformity of sprinkler-applied water and fertilizers, 59 (2003) 1

Unsaturated zone
Field test of a soil water balance simulation model, 58 (2003) 223

Ustifluvent soil
Development of hydrologically optimal land formation practice for gully erosion susceptible ustifluvent soil, 59 (2003) 113

Vadose zone
Dynamics of water flow and fertilizer solute leaching in lateritic soils of Kharagpur region, India, 63 (2003) 77

Validation
Effective management of irrigation water for wheat under stressed conditions, 63 (2003) 37

Vegetation growth zones
Vegetation growth zonation of Sri Lanka for improved water resources planning, 58 (2003) 123

Victoria
Farmer participation in markets for temporary and permanent water in southeastern Australia, 63 (2003) 57

Vietnam
Over-irrigation of *Coffea canephora* in the Central Highlands of Vietnam revisited. Simulation of soil moisture dynamics in Rhodic Ferralsols, 63 (2003) 185

Virtual water
Agricultural water management in water-starved countries: challenges and opportunities, 62 (2003) 165

Volumetric water content (VWC)
Comparison of calculated and measured volumetric water content at four field sites, 58 (2003) 209

Wastewater
Irrigation management under water scarcity, 57 (2002) 175
Impact of treated wastewater irrigation on quality attributes and contamination of tomato fruit, 61 (2003) 51

Water and nitrogen balance
Monitoring water and NO_3-N in irrigated maize fields in the Sorraia Watershed, Portugal, 60 (2003) 199

Water availability
Water balance variability across Sri Lanka for assessing agricultural and environmental water use, 58 (2003) 171

Water balance
Modeling root growth and the soil–plant–atmosphere *continuum of cotton crops, 60 (2003) 99*
Supplemental irrigation for dry-spell mitigation of *rainfed agriculture in the Sahel, 61 (2003) 29*
Effective management of irrigation water for wheat under stressed conditions, 63 (2003) 37

Water balance components
Model-based assessment of water balance components under different cropping systems in north-west India, 57 (2002) 75

Water blending
Agricultural water management in water-starved countries: challenges and opportunities, 62 (2003) 165

Water demand elasticity
Water scarcity, pricing mechanism and institutional reform in northern China irrigated agriculture, 61 *(2003) 143*

Water depth
Rice growth and yield respond to changes in water depth and salinity stress, 59 (2003) 67

Water flow
Using inverse methods for estimating soil hydraulic properties from field data as an alternative to direct methods, 59 (2003) 77

Water harvesting
Productivity in maize based cropping systems under various soil–water–nutrient management strategies in a semi-arid, alfisol environment in East Africa, 59 (2003) 217
Supplemental irrigation for dry-spell mitigation of rainfed agriculture in the Sahel, 61 (2003) 29

Water markets
Farmer participation in markets for temporary and permanent water in southeastern Australia, 63 (2003) 57

Water movement
Comparison of calculated and measured volumetric water content at four field sites, 58 (2003) 209

Water productivity
Comparing water input and water productivity of transplanted and direct-seeded rice production systems, 57 (2002) 11

Water relations
The response of sugar beet to drip and low-pressure sprinkler irrigation in southern Italy, 60 (2003) 135

Water requirement
Estimating water table contributions to corn and sorghum water use, 58 (2003) 67
Monitoring irrigation water use by combining Irrigation Advisory Service, and remotely sensed data with a geographic information system, 61 (2003) 111

Water saving
Comparing water input and water productivity of transplanted and direct-seeded rice production systems, 57 (2002) 11

Water scarcity
Irrigation management under water scarcity, 57 (2002) 175
Water scarcity, pricing mechanism and institutional reform in northern China irrigated agriculture, 61 (2003) 143

Water stress
Simulation of root water uptake. II. Non-uniform transient water stress using different reduction functions, 57 (2002) 111
Simulation of root water uptake. III. Non-uniform transient combined salinity and water stress, 57 (2002) 127
Effect of irrigation scheduling on potato crop parameters under water stressed conditions, 59 (2003) 49
Water use efficiencies of grain sorghum grown in three USA southern Great Plains soils, 59 (2003) 97
The response of sugar beet to drip and low-pressure sprinkler irrigation in southern Italy, 60 (2003) 135
Evapotranspiration, yield and water use efficiency of drip irrigated corn in the Bekaa Valley of Lebanon, 63 (2003) 125

Water stress effect
A simulation study of the effect of soil water balance and water stress on winter wheat production under different climate change scenarios, 61 (2003) 195

Water table
Modelling capillary rise and soil salinity for shallow saline water table under irrigated and non-irrigated conditions, 61 (2003) 125

Water trading
Farmer participation in markets for temporary and permanent water in southeastern Australia, 63 (2003) 57

Water uptake
Simulation of root water uptake. II. Non-uniform transient water stress using different reduction functions, 57 (2002) 111
Effect of irrigation methods and quota on root water uptake and biomass of alfalfa in the Wulanbuhe sandy region of China, 62 (2003) 139

Water use
Water balance variability across Sri Lanka for assessing agricultural and environmental water use, 58 (2003) 171
Analysis of an irrigation district in northeastern Spain. I. Characterisation and water use assessment, 61 (2003) 75

Water use efficiency (WUE)
Yield and water use of broadleaf crops in a semiarid climate, 58 (2003) 255
Actual evapotranspiration and crop coefficients of wheat (*Triticum aestivum*) under varying moisture levels of humid tropical canal command area, 59 (2003) 33
Water use efficiencies of grain sorghum grown in three USA southern Great Plains soils, 59 (2003) 97
Evapotranspiration analysis and irrigation requirements of quinoa (*Chenopodium quinoa*) in the Bolivian highlands, 60 (2003) 119
Crop water use and water use efficiency on irrigated cotton farms in Australia, 61 (2003) 179
Effects of deficit irrigation on yield and water use of greenhouse grown cucumber in the North China Plain, 61 (2003) 219
Salinity effect on crop development and yield, analysis of salt tolerance according to several classification methods, 62 (2003) 37
Production and quality of the sugar beet (*Beta vulgaris* L.) cultivated under controlled deficit irrigation conditions in a semi-arid climate, 62 (2003) 215

Effective management of irrigation water for wheat under stressed conditions, 63 (2003) 37
Evapotranspiration, yield and water use efficiency of drip irrigated corn in the Bekaa Valley of Lebanon, 63 (2003) 125
Effects of different irrigation regimes on the growth and yield of drip-irrigated potato, 63 (2003) 153

Water User Association
Management turning-over and participatory management of irrigation schemes: a case study of the Gediz River Basin in Turkey, 62 (2003) 205

Waterlogging
Adverse effect of waterlogging and soil salinity on crop and land productivity in northwest region of Haryana, India, 57 (2002) 223

Water-yield relationship
Deficit irrigation effects on sweet corn (*Zea mays saccharata* Sturt) with drip irrigation system in a semi-arid region. I. Water-yield relationship, 61 (2003) 63

WAVE
Over-irrigation of *Coffea canephora* in the Central Highlands of Vietnam revisited. Simulation of soil moisture dynamics in Rhodic Ferralsols, 63 (2003) 185

WAVE model
Using inverse methods for estimating soil hydraulic properties from field data as an alternative to direct methods, 59 (2003) 77

Wetland and dryland farming
Soil characteristics and constraints to crop production in inland valley bottoms in southwestern Nigeria, 61 (2003) 13

Wetted perimeter
Estimation of advance and infiltration equations in furrow irrigation for untested discharges, 60 (2003) 227

Wetted volume
Multi-wire time domain reflectometry (TDR) probe with electrical impedance discontinuities for measuring water content distribution, 59 (2003) 205

Wheat
Actual evapotranspiration and crop coefficients of wheat (*Triticum aestivum*) under varying moisture levels of humid tropical canal command area, 59 (2003) 33
Effect of saline drainage effluent on soil health and crop yield, 62 (2003) 127

Wheat (*Triticum aestivum*)
Crop coefficient and ratio of transpiration to evapotranspiration of winter wheat and maize in a semi-humid region, 59 (2003) 239

Winter wheat
Field evaluation of crop yield as affected by nonuniformity of sprinkler-applied water and fertilizers, 59 (2003) 1
A simulation study of the effect of soil water balance and water stress on winter wheat production under different climate change scenarios, 61 (2003) 195
Consumption of available soil water stored at planting by winter wheat, 63 (2003) 99

Wulanbuhe sandy region
Effect of irrigation methods and quota on root water uptake and biomass of alfalfa in the Wulanbuhe sandy region of China, 62 (2003) 139

Yield
Field evaluation of crop yield as affected by nonuniformity of sprinkler-applied water and fertilizers, 59 (2003) 1
Effects of different drip irrigation programs on the boll number and shedding percentage and yield of cotton, 60 (2003) 1

Yield components
Rice growth and yield respond to changes in water depth and salinity stress, 59 (2003) 67

Yield response factor
Evapotranspiration analysis and irrigation requirements of quinoa (*Chenopodium quinoa*) in the Bolivian highlands, 60 (2003) 119

***Zea mays* L.**
Evapotranspiration, yield and water use efficiency of drip irrigated corn in the Bekaa Valley of Lebanon, 63 (2003) 125
